

Basic HTML application

This is how I applied basic HTML application:

-a page with information about the website and the brands of the shoes.

```
<link href="design.css" rel="stylesheet" type="text/css">
<h1> Feel Free To Browse Different Brands Of Shoes</h1>
<header class="header">
  <a href="#" class="Welcome"> Welcome</a>

  <nav class="navbar">
    <a href="Nike.html">Nike </a>
  <a href="Puma.html"> Puma </a>
  <a href="adidas.html"> Adidas </a>
  <a href="anta.html"> Anta </a>
  <a href="video.html"> Videos</a>
```

Result:
