

External Css and Responsiveness

This is how I implemented External Css and Responsiveness on my Website:

```
.navbar a{
    font-size: 20px;
    color: white;
    font-weight: 500;
    text-decoration:underline;
    left: auto;
    right: auto;
    margin: 50px;
    font-family: 'Trebuchet MS', 'Lucida Sans Unicode', 'Lucida Grande', 'Lucida
Sans', 'Arial', 'sans-serif';
    cursor: pointer;
}

.navbar a ::before{
    content: '';
    position:absolute ;
    top: 100%;
    left: 0;
    width: 0;
    height:2px;
    background: #fff;
}

.navbar a ::after{
    position: absolute;
    content: '';
    top: 0;
    left: 0;
    width: 0;
    height: 100%;
    background: black;
    transition: all 0.35s;
    border-radius: 4px;
}
```

```
}  
  
.navbar a:hover{  
  background-color: grey;  
}  
  
.navbar a .bar{  
  width: 25;  
}  
}
```
